

CONTENT

Foreword.....	3
Gavryushin O. Databases of historical administrative units as the infrastructure foundation for historical and geographical research.....	6
Golubtsov O. Methodological aspects of natural and geographic information in landscape GIS (for example Shchors district, Chernihiv region).....	9
Davydenko A. The building databases of socially dangerous diseases as part of the content of geospatial data from the section «Health».....	14
Davydchuk V., Sorokina L., Zarudna R. A multiscale landscape map as a means of displaying a complex geospatial information.....	18
Dyshlyk O., Chabanyuk V. The application of the framework geospatial solutions GeoSF in the thematic mapping.....	24
Doroshkevich S. Scientific basis for the building maps of soil covers Pleistocene on the example of the Middle Pobuzhya....	28
Kazansev, N. Basic spatial data and the efficiency of spatial data infrastructures in Russia.....	33
Karpinskiy Y., Lyashchenko A. From the cartographic production infrastructure to Spatial Data Infrastructure.....	39
Kovalchuk I., Andreychuk Y., Ivanov E. Format-typological structure of the GIS model small river basin system.....	61
Kovalchuk I., Lischuk N. Structure of the knowledge base of a reclaimed land of the regional level.....	69
Kougar V., Verlan A., Datsyuk O. The basis of the integrated spatial data infrastructure in the EU - INSPIRE.....	74
Koshkarev A. Russian spatial data infrastructure: the current status and problems.....	80
Koshkarev A., Medvedev A., Ataeva O., Serebryakov V., Teimuraz K. The integration of spatial data in a distributed academic infrastructure.....	84
Liashenko D. Foreign trade information in the Spatial Data Infrastructure in Ukraine.....	90
Matviyishyna Zh., Gerasimenko N. Paleogeographical approaching to the small-scale paleolandscape maps creating	96

Matsibora O. GIS database of the complex investigations of a holocene soil.....	101
Parkhomenko G. Aerospace channel input, storage, update of geospatial information in the system for monitoring the condition of the urban environment (for example, Kyiv).....	104
Patrakeev I. Mapping Cyberspace: visualization and analysis of the virtual world.....	110
Pashynska N. Transport network as part of spatial data infrastructure	114
Peresadko V., Sinna O. The problems of the formation of the environmental component of geodata infrastructure in Ukraine.....	119
Plotnytskiy S., Tsurkan O. Digital soil maps as part of Spatial Data Infrastructure in Ukraine.....	122
Pozachenyuk E., Ohremenko I. Environmental infrastructure as a means to stabilize the geo-environmental state of the territory (for example, the plain part of Crimea).....	128
Putrenko V. The world experience of related information in geospatial data infrastructures.....	133
Rudenko L., Bochkovska A., Terefera O. Resources of the National Atlas of Ukraine in building GIS space of the state...	139
Savchuk I. Ways of improving the infrastructure of geospatial data in the study of the international passenger rail of Ukraine	142
Savchuk O. The principles of creating databases for specialized GIS mapping of the banking system of Ukraine.....	146
Saychuk V. The methodical aspects of socio-geographic analysis of regional labor market.....	151
Skavronskiy V. The peculiarities of presentation of thematic information on the maps of the atlases of districts.....	156
Topchiev O. The general methodological scheme of the geoplanning of the region.....	159
Tretyakov A. The structures of spatial data for decision making in the field of bioenergy.....	164
Chabanyuk V. Spatial Data Infrastructure for the Kiev city information systems.....	167
Shashero A. GIS ensuring of the territory planning.....	172
Yarovuy M. Geographic database hydronetwork (for example Sula Basin).....	177
